

SAFETY DATA SHEET

1. Product Identification

Champion Brands, LLC
1001 Golden Drive
Clinton, MO 64093
(660) 885-8151

Product line: CHAMPION® Safety Solvent
Products: 4114
CAS: 64742-47-8
Synonyms: Distillate, hydrotreated light
Recommended use: Industrial Solvent
Restrictions: Do not use near heat/sparks/open flames.
Created: 29 December 2015
Revised: 30 December 2015
Emergency phone: CHEMTREC: (+1) 800-424-9300

2. Hazards Identification

Appearance: Clear, colorless liquid
Odor: Mild hydrocarbon odor
Classification(s): Flammable Liquid, Category 4
Aspiration Hazard, Category 1

Target organs:
Symbol(s):

Signal Word: DANGER
Hazard Statement(s): Combustible liquid. May be fatal if swallowed and enters airways. Causes skin irritation.

Other hazard(s): Repeated exposure may cause dryness of the skin. May cause drowsiness or dizziness.

Precaution(s): Keep away from heat/sparks/open flames/hot surfaces – no smoking. Do not breathe mist/vapors/spray. Use in a well

ventilated area. Wear protective gloves/protective clothing. Do no ingest. IF SWALLOWED: Do NOT induce vomiting. Get immediate medical attention

Disposal: Keep out of waterways. Check local, national, and international regulations for proper disposal

3. Composition/Information on Ingredients

Hazardous Ingredients:

Component	CAS No.	Conc (wt%)
Distillates (petroleum), hydrotreated light	64742-47-8	99 – 100

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section

4. First Aid Measures

Eyes	Remove contact lenses, if worn. Rinse with running water for at least 15 minutes, lifting upper and lower eyelids occasionally. Seek medical attention if irritation persists.
Skin	Remove affected clothing and launder before reuse. Wash affected area for at least 15 minutes with soap and running water. Seek medical attention if persistent irritation occurs. Prolonged or repeated exposure may cause defatting of the skin – symptoms include redness, dryness, cracking
Inhalation	Remove exposed person to fresh air immediately. Restore or assist breathing, if necessary. Get medical attention if breathing is slow or difficult.
Ingestion	If swallowed DO NOT induce vomiting. If vomiting occurs spontaneously, keep head below hips to minimize the chance of aspiration. If fever, shortness of breath, congestion, coughing or wheezing occurs, get immediate medical attention.
Additional Info Specific Treatments	Note to physician: High potential for chemical pneumonitis! Consider gastric lavage with protected airway, or administration of activated charcoal. Call poison control for specific guidance.

5. Fire Fighting Measures

NFPA (estimated): **Health – 1** **Fire – 1** **Instability – 0**

Flash Point 79°C / 170°F

Extinguishing Media Foam, water spray or fog. Dry chemical powder, carbon dioxide, sand or earth may be used for small fires only. Do not discharge extinguishing waters into the aquatic environment.

Unsuitable Media Do not use water jet

Firefighting Procedures: Keep nearby containers cool with water spray.

Unusual Hazards Closed containers may build up significant pressure when exposed to heat. Material will flow over water pools and may cause fire to spread. Incomplete combustion can produce carbon monoxide.

6. Accidental Release Measures

Personal precautions, protective equipment, and emergency procedures:

Flammable liquid – can cause flash fires from a significant distance to a source of ignition. Keep unnecessary personnel away. Wear appropriate personal protective equipment for emergency. Ventilate if released in a confined area. Eliminate sources of ignition if it is safe to do so.

Environmental precautions: Avoid release to the environment. Prevent from entering into soil, ditches, sewers, waterways or groundwater

Methods for removal: Use an explosion-proof pump to remove bulk liquid. Residual liquid can be absorbed on inert material or evaporated with adequate ventilation. **Use only non-sparking tools.**

7. Handling and Storage

Max. Handling Temp: Do not store or handle at elevated temperatures. See Section 5 for flammability and Section 10 for chemical stability

Procedures: Use only in a well ventilated area. Avoid breathing vapors. Keep containers closed when not in use. Use appropriate containment to avoid environmental contamination. Vapors are heavier than air and will tend to accumulate in low areas. Avoid sources of ignition and use non-sparking tools. Avoid use in confined areas without adequate ventilation. Areas of inadequate ventilation could contain concentrations high

enough to cause eye irritation, headaches, or nausea. Avoid breathing dust, fume, gas, mist, vapors, or spray. Wash thoroughly after handling. Launder contaminated clothing before reuse. Empty container contains product residue which may exhibit hazards of the product. Do not weld, heat, or pressurize empty containers. Do not re-use containers. Dispose of packaging or containers in accordance with local, regional, national, and international regulations. Store away from strong oxidizers

Max Store Temp: Do not store or handle at elevated temperatures.

Unsuitable Materials: Avoid prolonged contact with natural, butyl or nitrile rubbers.

Other: Store in a diked area and prevent discharge into the aquatic environment

8. Exposure Controls/Personal Protection

Exposure Limits

US

Guidelines by component

Distillates (petroleum), hydrotreated light (CAS # 64742-47-8)

ACGIH: 200 ppm, 8hrs (TLV)

Other Exposure Limits: Not determined

Engineering Controls: Use in a well ventilated area. Local and general ventilation should keep methanol vapor concentration below permissible limits. Where exposure potential exceeds recommended limits, use a NIOSH/OSHA approved supplied air respirator as recommended. Vapors are heavier than air and will tend to accumulate in low-lying areas.

Personal Protective Equipment

Respiratory: Use a positive-pressure supplied-air NIOSH approved respirator when used in confined spaces or where engineering controls are not sufficient to limit exposure to below recommended limits

Eye: Face shield or chemical splash goggles when splashing may occur. If possible, remove contact lenses before handling

Gloves: Use neoprene or viton gloves. Nitrile gloves can be used – but prolonged contact may cause the rubber to degrade

- Clothing:** Use chemical resistant pants and jackets
- Other:** Locate the nearest eyewash station and safety shower before handling this product. Limit exposure whenever possible. Consider flammability and always use non-sparking tools.
- Hygiene:** Wash thoroughly after handling this product.

9. Physical and Chemical Properties

Appearance	Clear, colorless to pale yellow liquid
Odor	Mild hydrocarbon odor
Odor threshold	Not determined
pH	Not determined
Melting Point	Not determined
Initial Boiling Pt	200°C / 392°F
Flash Point	79°C / 170°F (Closed cup)
Evaporation Rate	Not determined
Upper Explosion Lm	4.9% vol. in air
Lower Explosion Lm	0.5% vol. in air
Explosive Data	Vapors of this product may form explosive mixtures with air
Vapor Pressure	0.072kPa (0.54mm Hg) @ room temp.
Vapor Density	7.1 (where air = 1)
Volatile Organics	100%
Density	0.8 mg/cu. cm @ 15.6°C
Solubility	Negligible
K_{ow}	Not determined
Viscosity	1 mm/s ² @ 40°C / 105°F
Autoignition Point	232°C / 450°F
Decomposition Temp	Not determined

10. Stability and Reactivity

Stability	Material is normally stable at ambient temperatures and pressures. Has low vapor pressure – vapors may form explosive mixtures with air!
Decomposition Temp	Not determined. Stable under normal conditions of use
Incompatibility	Keep away from strong oxidizers. Contact with these materials may cause violent or explosive reactions.
Polymerization	Will not occur
Thermal Decomposition	Combustion products highly dependent on conditions. Produces carbon oxides. Lower oxygen environments are likely to produce more harmful particulate carbon, polyaromatic heterocycles, carbon monoxide and other organic compounds.

Conditions to Avoid Combustible liquid – keep away from strong oxidizers as well as heat/sparks/open flames/hot surfaces.

11. Toxicological Information

- Acute Exposure –

Eye Irritation Not irritating to eye
Skin Irritation Mild skin irritant. Repeated exposure may cause dermatitis, drying, cracking, and defatting of the skin.
Respiratory Irritation Inhalation of vapors or mists may cause irritation to the respiratory system.
Dermal Toxicity Low order of toxicity LD50 >2g/kg, rabbit
Inhalation Toxicity Expected to be of low toxicity if inhaled.
Oral Toxicity Low order of toxicity LD50 >5g/kg, rat
Aspiration Hazard This product has a very low viscosity and may be fatal if aspirated into the airways. Do NOT induce vomiting, as this increases risk of aspiration/chemical pneumonitis. Aspiration may be fatal.

- Chronic Exposure –

Chronic Toxicity This product may cause dryness or defatting of the skin, dermatitis, or may aggravate existing skin conditions.
Carcinogenicity Not classified as a carcinogen. Repeated skin contact of trace impurity has resulted in irritation and skin cancer in animals (Naphthalene)
Mutagenicity Available information does not suggest that this product is a germ cell mutagen
Reproductive Toxicity Available information does not suggest that this product is a reproductive toxin.
Teratogenicity Available information does not suggest that this product is a teratogen

- Additional Information –

Target organ toxicity Single Exposure – Not expected to be hazardous
 Repeat exposure (Kidney) – caused kidney effects in male rats which are not considered relevant to humans
Synergistic effects No data available
Pharmacokinetics No data available

12. Ecological Information

- Environmental Toxicity –

Fish Not determined
Aquatic Invertebrates Not determined

Algae	Not determined
Bacteria	Not determined
Microorganisms	Not determined

- Environmental Fate –

Biodegradation	Expected to be readily biodegradable. Oxidizes rapidly by photo-chemical reactions in the air.
Bioaccumulation	Adheres to soil – has the potential to bioaccumulate
Soil Mobility	Adsorbs to soil and has low mobility under normal conditions
Other Effects	Floats on water and produces a sheen – very mobile in the aquatic environment

13. Disposal Considerations

Disposal Considerations

All disposal practices must be in accordance with local, regional, national, and international regulations. Store material for disposal as indicated in Section 7. Disposal by controlled incineration or recycling may be acceptable – review applicable regulations or regulatory bodies before making disposal decisions.

Contaminated Containers or Packaging

Empty containers are likely to contain flammable vapors or explosive mixtures of vapor and air. Do NOT weld, cut, or grind empty containers. Send to reconditioner or metal reclaimer if possible. Dispose of in accordance with local, regional, national, and international regulations

14. Transportation Information

Description shown may not apply to all shipping situations. Consult applicable shipping codes to determine any additional shipping requirements

US DOT	Not regulated
IMDG	Not regulated
ICAO/IATA	Not regulated

- Global Chemical Inventories/Regulations –

USA	All components of this material are on the US TSCA
Other TSCA Reg.	This product is listed on the TSCA as UVCB (Unknown, Variable composition, or Biological)
EU	Components of this product and similar mixtures are registered under REACH. Consult the European Chemicals Agency regarding REACH registration, reporting, and other legal requirements for kerosene before importing to the EU.
Canada	All components of this product are listed on the Canadian Domestic Substances List (DSL).
Canada WHMIS	D-2B: Material causing other toxic effects (toxic)

- Other U.S. Federal Regulations –

SARA Ext. Haz. Subst. No chemicals in this product are listed on the SARA 302 Extremely Hazardous Substances list.

SARA 311/312 *Acute Hazard* - NO
Chronic Hazard - YES
Fire Hazard - YES
Reactivity Hazard -

SARA Sect. 313 This product may contain listed chemicals below the de minimus levels which therefore are not subject to the notification requirements of Section 313 of the Emergency Planning and Community Right-to-Know Act.

CERCLA Haz. Sub. No chemicals in this product are reportable to the National Response Center under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA)

- State Regulations -

CA Prop 65 This product is not known to contain any chemicals currently listed as carcinogens or reproductive toxins

Right-to-Know Pennsylvania: Distillates (petroleum), hydrotreated light
64754-47-8

15. Other Information

Revision updates may be in many sections and the MSDS should be read in its entirety.
Prepared according to the UN Globally Harmonized System for the Classification and Labeling of Chemicals (GHS) by Champion LLC, 1001 Golden Drive, Clinton, Missouri 64735.
