1. Product Identification

Champion Brands, LLC  
1001 Golden Drive  
Clinton, MO 64093  
(660) 885-8151

Product line: CHAMPION ® DOT 3 Hydraulic Brake Fluid  
Products: 4057, 5001  
CAS: Not applicable (Mixture)  
Synonyms: Glycol-Based Brake Fluid  
Recommended use: Disk and drum hydraulic brake fluid  
Restrictions: Do not use where DOT5 is specified  
Created: 16 November 2016  
Revised: 6 March 2017  
Emergency phone: CHEMTREC: (+1) 800-424-9300

2. Hazards Identification

Appearance: Clear, pale yellow liquid  
Odor: Mild, sweet odor  
Classification(s): Acute Toxicity, Oral Category 4*  
Skin Irritation, Category 2  
Eye Irritation, Category 2A  
Target Organ Toxicity, Acute Category 2  
Target organs: Kidney, Liver, Central Nervous System  
Symbol(s):  

Signal Word: Warning  
Hazard Statement(s): Harmful if swallowed. Causes mild skin irritation. Causes serious eye irritation. May cause damage to kidneys, liver or central nervous system if ingested.  
Other hazard(s): Combustible liquid. Repeated exposure may cause dryness of the skin. Vapors may cause respiratory irritation.
Precaution(s): Wear eye and skin protection before handling. Do not breathe mist/vapors/spray. Use in a well ventilated area. Wear protective gloves/protective clothing. IF IN EYES: Flush with water for 15 minutes and consult a physician. Do no ingest. IF SWALLOWED: Do NOT induce vomiting. Immediately call a POISON CENTER or doctor/physician.

Disposal: Keep out of waterways. Check local, national, and international regulations for proper disposal.

HMIS (estimated): Health - 2  Fire - 1  Instability - 0

*Classified based on human experience and epistemological data, not based on strict application of the GHS criteria

3. Composition/Information on Ingredients

Hazardous Ingredients:

<table>

4. First Aid Measures

Eyes

Remove contact lenses, if worn. Rinse with running water for at least 15 minutes, lifting upper and lower eyelids occasionally. Seek medical attention.

Skin

Remove affected clothing and launder before reuse. Wash affected area for at least 15 minutes with soap and running water. Prolonged or repeated exposure may cause defatting of the skin – symptoms include redness, dryness, cracking

Inhalation

Remove exposed person to fresh air immediately. Restore or assist breathing, if necessary. Get medical attention immediately if symptoms of CNS depression or intoxication develop

Ingestion

Do NOT induce vomiting. If conscious, give two full glasses of water. If a significant volume has been swallowed, get medical attention immediately.
Swallowing large amounts of diethylene glycol is potentially lethal. Immediate symptoms may include severe abdominal cramping, diarrhea, vomiting, intoxication, and hypertension. Infrequent urination and other cardiac, neurological, and renal effects of metabolic acidosis, hyponatremia, or hyperkalemia may develop. Diethylene glycol has been known to cause metabolic acidosis leading to kidney and liver failure, neurological complications, and death.

Additional Info
Note to physician: Treat for diethylene glycol poisoning

Specific Treatments
Not determined.

5. Fire Fighting Measures

NFPA (estimated): Health - 2 Fire - 1 Instability - 0

Flash Point
93°C / 199°F (based on most flammable component)

Extinguishing Media
For small fires use alcohol foam, dry chemical or CO₂. For large fires apply large (flooding) quantities of water from as far away as possible in a spray or mist.

Unsuitable Media
Water jet may be ineffective

Firefighting Procedures:
Wear a self-container breathing apparatus if necessary based on concentrations of smoke. Material will produce primarily oxides of carbon as combustion products.

Unusual Hazards
Not Determined

6. Accidental Release Measures

Personal precautions, protective equipment, and emergency procedures:
Ventilate if released in a confined area. Avoid breathing mists/vapors/spray. Product may present slipping hazard if left on the floor. Beware of vapors pooling in low areas to explosive concentrations.

Environmental precautions:
Avoid release to the environment. Prevent from entering into soil, ditches, sewers, waterways or groundwater.

Methods for removal:
Use pump to remove bulk liquid. Residual liquid can be absorbed on inert material. Dispose of contaminated
adsorbent as hazardous waste. Wash the area with water after excess product and adsorbent is removed.

**7. Handling and Storage**

**Max. Handling Temp:** Not determined

**Procedures:** Use in a well ventilated area. Avoid breathing mists/vapors/spray. Avoid handling hot product where possible. Use appropriate personal protective equipment to avoid contact with skin and eyes. Note the location of nearest emergency shower and eye wash station before use. Store with the lid tightly closed in a cool, dry, well-ventilated place. Product is hygroscopic and effectiveness may diminish if opened product is stored for long periods of time. Dispose of spilled or used material in accordance with local, regional, national, and international regulations.

**Max Store Temp:** Do not store or handle at elevated temperatures.

**8. Exposure Controls/Personal Protection**

**Exposure Limits**

**US Guidelines by component**

- Diethylene Glycol (CAS # 111-46-6)
  - OSHA TWA: 10mg/m3

- 2-(2-butoxyethoxy)ethanol (CAS #112-34-5)
  - ACGIH TWA: 10ppm (inhalable fraction and vapor)

**Other Exposure Limits:** Not determined

**Engineering Controls:** Use in a well ventilated area. Local and general ventilation should keep methanol vapor concentration below permissible limits. Where exposure potential exceeds recommended limits, use a NIOSH/OSHA approved supplied air respirator as recommended. Vapors are heavier than air and will tend to accumulate in low-lying areas.

**Personal Protective Equipment Respiratory:** Use a NIOSH or CEN approved full-face respirator with multipurpose combination or type ABEK respirator cartridges as a backup to engineering controls. If the respirator is the only means of protection, use a full-face supplied air respirator.
**Eye:** Use tightly-fitting chemical splash goggles. Use face shield, especially where splashing is likely to occur

**Gloves:** Use nitrile, butyl, viton, or fluoroelastomer gloves. Even appropriate materials may degrade after prolonged exposure with product.

**Clothing:** Use chemical resistant pants and jackets, preferably of butyl or nitrile rubber

**Other:** Locate the nearest eyewash station and safety shower before handling this product. Limit exposure whenever possible.

**Hygiene:** Wash thoroughly after handling this product.

### 10. Stability and Reactivity

**Stability** Material is normally stable at ambient temperatures and pressures.

**Decomposition Temp** Not determined

**Incompatibility** Keep away from strong oxidizers and strong acids/bases. Keep away from strong reducing agents such as powdered active metals.
Polymerization  Will not occur
Thermal Decomposition  Primarily oxidizes to carbon dioxide in normal combustion conditions. In lower oxygen environments carbon monoxide, formaldehyde, or formic acid may be formed.

Conditions to Avoid  Vapors may catch fire – keep away from strong oxidizers, acids, bases as well as heat/sparks/open flames/hot surfaces

11. Toxicological Information

- Acute Exposure -

Eye Irritation  Expected to cause mild to moderate irritation of the eye if exposed to liquid or in high vapor concentrations. May cause irritation, tearing, or burning of the eyes.

Skin Irritation  Expected to be mildly irritating to the skin. Symptoms of irritation may include redness, drying, and cracking of the skin.

Respiratory Irritation  High vapor concentrations may cause transient irritation to the respiratory system.

Dermal Toxicity  This product can be absorbed through the skin, but is of low order of toxicity. Limit exposure to skin where possible.

Inhalation Toxicity  Toxicity is similar to that for oral ingestion, though this exposure mode is far less likely to occur.

Oral Toxicity  Toxic or fatal if ingested. Symptoms of diethylene glycol poisoning include severe abdominal cramping, diarrhea, vomiting, sweating, confusion, cardiac abnormalities, neurological abnormalities, infrequent urination, intoxication or CNS depression. If left untreated, product will metabolize to cause metabolic acidosis, renal failure, hyperkalemia, hyponatremia, parylsis, cardiac failure, or death. Seek medical attention immediately for poisoning. If ingested, DO NOT wait for symptoms to develop before getting treatment.

Aspiration Hazard  This product has a very low viscosity and may be fatal if aspirated into the airways. Do NOT induce vomiting, as this increases risk of aspiration.

- Chronic Exposure -

Chronic Toxicity  This product may cause dryness or defatting of the skin, dermatitis, or may aggravate existing skin conditions.

Carcinogenicity  This product and its components are NOT listed by the IARC, NTP, ACGIH, or OSHA as carcinogens

Mutagenicity  Available information does not suggest that this product is a germ cell mutagen

Reproductive Toxicity  Available information does not suggest that this product is a reproductive toxin.

Teratogenicity  Diethylene glycol has produced birth defects in rats at concentrations that are toxic to the mother.
- Additional Information -

**Target organ toxicity**  
Product is toxic to organs: Kidneys, liver, central nervous system, heart. Metabolic products of diethylene glycol produce acidosis and organ toxicity effects. In some cases, other metabolic abnormalities have been reported such as hyponatremia and hyperkalemia leading to nerve and cardiac damage.

**Synergistic effects**  
Though specific data is not available, ethanol is a competing substrate for NAD-dependent alcohol dehydrogenase and may slow the production of harmful metabolic products of diethylene glycol.

**Pharmacokinetics**  
No data available

---

### 13. Disposal Considerations

**Disposal Considerations**

All disposal practices must be in accordance with local, regional, national, and international regulations. Store material for disposal as indicated in Section 7. Disposal by controlled incineration or by secure land fill may be acceptable – review applicable regulations or regulatory bodies before making disposal decisions.

**Contaminated Containers or Packaging**

Empty containers are likely to contain flammable vapors or explosive mixtures of vapor and air. Do NOT weld, cut, or grind empty containers. Rinse empty containers with water and dispose of in accordance with local, regional, national, and international regulations.
14. Transportation Information

Description shown may not apply to all shipping situations. Consult applicable shipping codes to determine any additional shipping requirements.

**US DOT**
- Not dangerous goods

**IMDG**
- Not dangerous goods

**ICAO/IATA**
- Not dangerous goods

15. Regulatory Information

- **Global Chemical Inventories/Regulations** -
  - **USA**
    - All components of this material are on the US TSCA
  - **EU**
    - Components of this product and similar mixtures are registered under REACH. Consult the European Chemicals Agency regarding REACH registration, reporting, and other legal requirements for before importing to the EU.
  - **New Zealand**
    - May require notification before sale under New Zealand Regulations
  - **Canada**
    - All components of this product are listed on the Canadian Domestic Substances List (DSL).
  - **Canada WHMIS**
    - B3

- **Other U.S. Federal Regulations** -
  - **SARA Ext. Haz. Subst.**
    - No components listed as Extremely Hazardous Substances list. See 40 CFR 355
  - **SARA Sect. 313**
    - Triethylene glycol monobutyl ether (CAS @ 143-22-6), 2-(2-butoxyethoxy)ethanol (CAS # 112-34-5), nitrate compounds (EPA ID # N511) and diethanolamine (CAS @ 111-42-2) are subject to reporting under SARA Title III, Section 313. See 40 CFR 372

- **SARA 311/312 Class**
  - Acute Hazard - YES
  - Chronic Hazard - NO
  - Fire Hazard - NO
  - Reactivity Hazard - NO

- **CERCLA Haz. Sub.**
  - No components listed. See 40 CFR 302

- **State Regulations** -
  - **CA Prop 65**
    - WARNING: This product contains diethanolamine known to the State of California to cause cancer and, ethylene glycol
monomethyl ether, which is known to the State of California to cause birth defects or other reproductive harm
