

#4056
HYDRAULIC JACK OIL

CHAMPION HYDRAULIC JACK OIL is designed for use in most portable hydraulic jacks and hydraulic systems. It reduces friction and prevents foaming, which makes the jacks safer and easier to use because of smoother operation, and reduced cavitation and pressure leakage. It has inhibitors to prevent oxidation, sludge and rust even in systems that are infrequently used. It has a low pour point which ensures smooth operation in cold temperatures.

TYPICAL SPECIFICATIONS

Product Code	4056
ISO	32
Gravity API @ 60° F	30.0
Viscosity:	
cSt @ 40° C	31.0
cSt @ 100° C	4.9
Pour Point ° F	-30
Flash Point ° F	400
Sulfated Ash	Nil
Carbon, Conrad % wt.	0.08
Color	L1.5

Available in:

#4056H - 12/1 quart
