

CHAMPION FORM RELEASE OIL

Champion® Form Release is a mineral oil based concrete form release agent made from purified petroleum stocks and proprietary chemistry including specific selections of fatty acids in combination with antioxidants.

Champion® Form Release specialized chemistry is designed and recommended for universal use on wood, metal, and prefabricated concrete molds. In addition to great form release properties, it also provides an excellent bearer of protection on all metal forms preventing rust formation.

Champion® Form Release benefits include:

- Universal release agent for different concrete forms
- Non-staining
- Penetrates and coats surfaces and crevices.
- Protects metal forms from rust formation.
- Works well in both spray and roll-on applications
- Equal performance and protection in both hot and cold environments

TYPICAL PROPERTIES

Product Code	4103
MSDS #	900
Gravity API @ 60°F	34.4
Acid Number mg/ml KOH	= 5.5
Viscosity, cSt at 40°C	~ 14.0
Pour Point °F	= -50
Flash Point °F	392

Effective 04/13
