

AIR BRAKE ANTIFREEZE

Champion Air-Brake Antifreeze is recommended for use in air brake lines to prevent line freeze ups, and to absorb moisture in the system. It protects and keeps air brake systems clean. Champion Air-Brake Antifreeze is not harmful to hoses or seals, and protects the system from rust and corrosion when used regularly in both the winter and the summer.

CONDITIONER & RUSTGUARD (METHANOL)

TYPICAL PROPERTIES

Appearance	Clear, colorless liquid
Odor	Mild alcoholic odor
Melting Point	-26°C / -15°F
Initial Boiling Pt	82°C / 180°F
Flash Point	35°C / 95°F
Vapor Density	>1 (where air = 1)
Density	0.957 mg/cu. cm @ 15.6°C
Solubility	Miscible in water, alcohol; insoluble in organic solvents

DIRECTIONS

Pour Air Brake Anti-Freeze in to alcohol evaporator until container is two-thirds full. Bubbles should pass through Anti-Freeze while compressor is operating. Make sure all connections are tight and in good condition.

Available in:

#4137H - 12/1 quart

#4137N - 4/1 gallon

**DANGER: EXTREMELY FLAMMABLE. HARMFUL OR FATAL IF SWALLOWED.
VAPOR HARMFUL.**

4137

Effective 06/13
