

CHAMPION Power Steering Fluid

Champion® Power Steering Fluid is formulated with premium hydrotreated base oils and balanced additive chemistry for effective performance and protection in older power steering systems, or those specifying GM Dexron IID, GM Dexron III or Ford Mercon fluids. Our friction modifier technology minimizes squeal or squawk in power steering systems. Inhibitor technology and anti-wear additives protects pumps and parts from corrosion, oxidation, and scuffing. Highly effective seal conditioners prevent hardening and shrinking of seals, keeping them soft and pliable.

- Protects against corrosion of metallic parts
- Eliminates squeal and squawk in older systems
- Extends pump life and reduces pump wear
- Low foam reduces cavitation wear
- Low-temperature performance ensures startup lubrication
- Compatible with all mineral and synthetic power steering fluids

Champion® Power Steering Fluid is recommended for use in vehicle power steering systems requiring fluids with the following specifications or with the following part numbers

- GM 9985010 Saginaw
- Daimler/Chrysler MS5931F, MS1872
- Ford M2C138-CJ, ESW-M2C128
- Dexron IID, III
- Mercon
- Chrysler ATF+3
- Accura/Honda (Prior to 2007)

Typical Properties:

Product Code	4182K
API Gravity @ 60F	31.0
Viscosity @ 40C, cSt	42
Viscosity @ 100C, cSt	7.25
Viscosity Index	160

4182K
Effective 12/12
