

## #4186 PLOW COAT

CHAMPION PLOW COAT is an economical way to protect metal tools and farm implements during off seasons, when not in use. It contains rust guard for maximum protection against rusting. This ready to use formula needs no thinning and dries within one hour to form a thin protective seal. One coat will last an entire season even during the harshest weather. It can be sprayed, dipped or brush applied. For protecting metal parts for a short period of time, it can be easily thinned with paint thinner or gasoline.

One gallon of Plow Coat will cover approximately 125 square feet of surface.
