

#4277POWER PLUS II

CHAMPION POWER PLUS II is designed for the treating of bulk fuel to obtain a premium high-speed diesel fuel. It is designed to be used as a bulk treatment for both low sulphur (on highway) and high sulphur (off highway) diesel fuel.

In addition to treating the fuel, it contains a corrosion inhibitor and anti-wear additive which both lubricate and protect the fuel pump and related components against corrosion. This is exceedingly important with the introduction of the low sulphur fuels which lack the lubricity characteristics that the high sulphur fuels had.

CHAMPION POWER PLUS II:

- For both high and low sulphur fuels.
- Helps keep injectors clean.
- Dissolves varnish and gum accumulation.
- Helps maintain clean fuel system for peak efficiency and increased power.
- Aids in combustion.
- Helps reduce high sulfur wear rate on engine components.
- Lowers fuel consumption.
- Reduces smoke.
- Prevents corrosion.
- Contains lubricity additive.
- Meets ASTM D5001 BOCLE Test requirements for lubricity.

DIRECTIONS

One gallon of Power Plus II treats 1,000 gallons of diesel fuel.

Available in

#4277A - 55 gallon

#4277B - 30 gallon

#4277D - 5 gallon
