

CHAMPION SYNTHETIC MULTI-TRANS LV

Champion's new, fully-synthetic multi-vehicle transmission fluid - meeting the requirements of today's most advanced and fuel efficient transmissions.

Champion Multi-Trans LV is specially designed to reduce drag and churning losses over thicker multi-vehicle fluids and retain the fuel economy that is delivered by planetary transmissions with more and more speeds.

- New, lower-viscosity fluid reduces churning and improves fuel economy
- Fully synthetic to maximize drain length while preventing sludging and varnish
- Excellent shear stability to maintain appropriate viscosity over long drain intervals
- OEM preferred chemistry maintains perfect friction balance and long-lasting protection

Champion recommends Synthetic Multi-Trans LV in the applications specifying:

- **Acura/Honda** ATF Z1 (except CVT)
- **Allison** C-3, C-4
