

SUPER CONCENTRATED **DIESEL FLO**[®] FUEL CONDITIONER

LESS SOLVENT. MORE VALUE.

Champion Diesel Flo is a premium diesel fuel anti-gel and de-icer designed to prevent operability issues in diesel fueling systems at sub-zero temperatures. Disperses and removes water from diesel fuel and prevents icing of fuel filters. Cold-flow improvers prevent aggregation of diesel wax crystals, allowing for lower pouring points, cold-filter plugging points (CFPPs), and gel temperatures in low-sulfur and ultra-low sulfur diesel fuels and biodiesel blends.

- **Most concentrated formula EVER** reduces solvent load and decreases cost-to-treat
- **Performs in low sulfur and ultra low sulfur diesel and biodiesel blends**
- **Reduces cold-filter plugging points by as much as 20°C (36°F) in untreated fuels**
- **Disperses and removes water from fuel**
- **Reduces the pouring point and gel temperature of fuel**
- **Helps prevent fuel filter icing and cold-filter plugging**
- **One quart treats up to 250 US Gallons of diesel fuel**

Always shake well before using. Product can continue to provide additional benefits up to approximately twice the labeled treat rate. Further over-treating does not provide significant additional benefit.
