

**#4231 SAE 40
GAS ENGINE OIL**

CHAMPION GAS ENGINE OILS are high VI oils manufactured from the finest quality select base stocks. These stocks are then blended with the latest “state of the art” additives to exacting specifications resulting in some of the finest lubricating oils available. They provide excellent thermal and oxidation stability and extended oil life with reduced ash deposits in the engine.

CHAMPION GAS ENGINE OILS are designed for use in Waukesha, Caterpillar, Superior and other naturally aspirated, turbo charged four cycle natural gas engines running at medium to high speeds. They can be used in engines equipped with catalytic converters as well as engines running on low level chlorine and sulfur alternative fuels.

TYPICAL SPECIFICATIONS

SAE	40
Product Code	4231
Gravity API @ 60° F	27.0
Viscosity:	
cSt @ 40° C	140
cSt @ 100° C	14.5
Pour Point ° F	5
Flash Point ° F	450+
Sulfated Ash	.49
Color	Dark Amber
